

SECTION A

General Unit Information:

Unit Name	Agile Project Management
Unit Code	CIS047-3
Level	6
Credit Value	30
Location(s) of Delivery	On Campus and Off Campus
Period(s) of Delivery	15 weeks
Pre-requisites or Restrictions	N/A
Aims and Relevance	The material in this unit is carefully designed to meet students' needs and requirements for their programme of study along with essential project management skills for their future employment. Students will be exposed to a wide variety of tools, techniques, methodologies and processes in the field of project management which encapsulate both modern and traditional approaches as an essential preparation for the dissertation stage. The unit also draws on expertise from other departments within the university including library services, the careers and employability service and the English language centre to support students in the best possible way.
Syllabus Content	• Introduction to Project Management • Starting a project • The Agile Manifesto and core agile principles • Common agile methodologies • Directing a Project - Managing Delivery • Progress Themes - Product Flow Diagrams • Quality Review and Project Plans • Product Description • Effective Time Management • Critical Path • Communication and Meetings • Cost and Risk Management • Scope and Conflict Management • Human Resources

Learning Outcomes

On completion of this unit you should be able to

1. Demonstrate the following knowledge and understanding

Differentiate and critically appreciate the professional, ethical and social context of agile project management methodologies and their instantiation into practical applications within the IT industry.

2. Demonstrate the following skills and abilities

Coherently analyse and evaluate an agile professional project management methodology for a collaborative project in view of its societal, commercial and economic context as well as its ethical implications.

PSRB Outcomes and/or Apprenticeship Standard

N/A

Summary Learning Hours

	Scheduled	Guided	Independent	Autonomous	Placement	Total
Hours	54	60	75	111	0	300
Percentage	18%	20%	25%	37%	0%	100%

Approach to Learning

This unit is delivered by lectures and seminar workshops. It is a challenging course and will require you to be self-motivated as well as being a team member. Many of the practical elements will require analysis and synthesis of a wide range of materials together with many case study examples from industry. You will need to work with minimum guidance to take on board the given concepts being able to critically review sourced evidence and to deliver a major piece of work as a part of a group at the end.

- Meaningful – the unit helps you acquire the skills necessary for employment within your chosen pathway in the Computing and Engineering industry
- Active - you are engaged throughout the unit in the learning process and will need to demonstrate professional standard skills
- Reflective – the unit aids your reflective process by observation and research bridging academia and the commercial environment
- Challenging – learning comes from working creatively with new concepts and strategies challenging.

Assessment Summary

No	Assessment Method	Learning Outcome(s)	Weight	Submission Week	Length of Assessment
1	Practical - Other Skills Assessment	1 and 2	70	10	30 minutes
2	Coursework - Artefact	1 and 2	30	12	one artefact

Learner Development

This Unit particularly focuses on the development of your abilities in the following areas:

Enquiry	You will be exposed to an agile project management methodology underpinned by the theory of project management that encompassed the knowledge area of scope, time, cost, risk, quality, stakeholders, human resources, communication and procurement. You will apply this methodology to a task that is defined by project constraints but which has to be detailed by the project team.
Contextual Understanding, including where employer based	You will encounter and elaborate upon the ethical and professional context of managing a project. You will also be exposed to the wider managerial context of being a project manager. This includes stakeholder management and team development. Aspects of individual culture and how cultural tensions impact on project success will be addressed also.
Collaboration	The assessment strategy is focussed on the notion of the project team. You have to analyse how your actions influence the team performance and what you – as an individual – can do to avoid or solve conflicts within the team.
Enterprise	This unit provides you with the opportunity to creatively explore new ways on how to interact productively within the constraints and guidance given by a project methodology. As part of a team you will design and produce new and tailored deliverables. It will also provide an experience of professional decision making and conflict management that will not only help you within future employment but that is also useful in life as such.
Assessment 1 Details	You will deliver a 30 minute demonstration (including 10 minute presentation) on recent developments in the area of agile methodologies for managing projects.
Assessment 2 Details	You will submit an artefact as specified in the format outlined in the detailed assessment brief for the unit that makes use of the agile project management methodology.
Assessment 3 Details	
Assessment 4 Details	

Threshold Expectations

In order to pass Assessment 1 you will need to :

Explain and justify how key areas of professional project management such as risk and quality have been addressed in relation to your given scenario.

Answer questions on the major aspects of the project including legal and ethical issues.

Present an assessment of the strengths and weaknesses of your chosen project management approach

In order to pass Assessment 2 you will need to:

Implement a promotional artefact

Explain, within your digital artefact code, making use of comments the design choices you have made during its development

Provide, within coding comments, a discussion as to how the artefact was developed and why

In order to pass Assessment 3 you will need to:

In order to pass Assessment 4 you will need to:

Section B

Recommended Reading

Core Text - this unit is supported by the following core text:

Schwalbe, Kathy (2017) Introduction to project management. 6th ed.

Guided Reading

The following is expected reading for this unit. Details of what to read and when will be provide in the BREO site.

Hughes, Bob and British Computer Society (2012) Project management for IT-related projects. 2nd ed. Swindon: BCS Learning and Development.

Project Management Institute (2013) A guide to the project management body of knowledge: (PMBOK® guide). 5th ed. Newtown Square, Pennsylvania: Project Management Institute.

Independent study – to receive high grades you will need to demonstrate your wider reading. The following resources provide useful background reading for the material in this unit. This is not an exhaustive list and students should read widely from the variety of journals available in the Learning Resources Centre

Juan Garbajosa, Xiaofeng Wang, Ademar Aguiar (2018) Agile Processes in Software Engineering and Extreme Programming; 19th International Conference, XP 2018, Porto, Portugal, May 21–25, 2018, Proceedings.

Independent Study

To receive high grades you will need to demonstrate your wider reading. The following resources provide useful background reading for the material in this unit. This is not an exhaustive list and students should read widely from the variety of journals available in the Learning Resources Centre.

Equality Impact Assessment

Question	Y/N/NA	Additional anticipatory adjustments/actions if necessary
Learning materials will be made available in advance of sessions for students to adapt as appropriate?	Y	

The approach to teaching and learning is sufficiently flexible to enable all students to succeed?	Y	
The approach to group work takes account of the needs of students with disabilities and from diverse backgrounds?	Y	
The approach to practical work takes account of the needs of students with disabilities?	Y	
Students with a protected characteristic* have an equal opportunity to achieve the learning outcomes?	Y	
The assessment tasks provide all students with an equal opportunity to succeed?	Y	
Any other aspects of the unit that might pose potential challenges from an equality or diversity perspective have been considered?	NA	

* Age, Gender reassignment, Marriage and civil partnership, Pregnancy and maternity, Race, Religion and belief, Sex, Sexual orientation

Section C

Administrative Information – Faculty completion	
Faculty	Creative Arts Technologies and Science
Portfolio	CU-COM
School/Department	School of Computer Science and Technology
HECOS Code(s)	100812
Unit Co-ordinator	Mitul Shukla
Apprenticeship ?	No

Courses that this unit is delivered on
BSc (Hons) Computer Science
BSc (Hons) Software Engineering
BSc (Hons) Artificial Intelligence and Robotics
BSc (Hons) Cybersecurity
BSc (Hons) Computer Networking
BSc (Hons) Information and Data Systems
BSc (Hons) Business Information Systems
BSc (Hons) Information Technology
BSc (Hons) Cybersecurity - Hong Bang International University (HBIU)
BSc (Hons) Cybersecurity - Middle East University (MEU)
