

SECTION A

General Unit Information:

Unit Name	Mobile Application Development
Unit Code	CIS099-2
Level	5
Credit Value	30
Location(s) of Delivery	On Campus and Off Campus
Period(s) of Delivery	15 weeks
Pre-requisites or Restrictions	N/A
Aims and Relevance	This unit will introduce students to mobile devices and applications. Students will learn about the tasks that mobile application development team will carry out. Students will also learn how to do the tasks using different methods and technologies to deliver mobile design, implementation and evaluation. Essentially the unit will detail the development of mobile computing, explain user interaction design methods and theories, and then go on to describe the differences in software development between mobile application programming and web application programming, and develop applications that incorporate both programming methods to efficiently construct a single application task.
Syllabus Content	Introduction to mobile computing Introduction to mobile application design User interaction design methods and theories for mobile computing Mobile application programming languages Evaluation techniques and methods for mobile applications Mobile applications marketing

Learning Outcomes

On completion of this unit you should be able to

1. Demonstrate the following knowledge and understanding

Comprehend and exploit criteria used to evaluate a range of mobile applications, methods and the technologies used for their design and development.

2. Demonstrate the following skills and abilities

Design, develop and evaluate a cross platform mobile application using suitable methods and technologies.

PSRB Outcomes and/or Apprenticeship Standard

N/A

Summary Learning Hours

	Scheduled	Guided	Independent	Autonomous	Placement	Total
Hours	72	96	105	27	0	300
Percentage	24%	32%	35%	9%	0%	100%

Approach to Learning

The unit will provide opportunities for students to acquire concepts, knowledge and skills of various mobile technologies that are delivered through lectures.
 Re-enforcement of this learning will be stimulated by guided lab practical works.
 Research and practical work will comprise many hours self-directed study including those for the assignment within the unit context.
 Supported and mutual help will be accessible through a virtual learning environment.
 Formal lectures will, where possible and appropriate, foster individual and group student activity.

Assessment Summary

No	Assessment Method	Learning Outcome(s)	Weight	Submission Week	Length of Assessment
1	Coursework - Individual Report	1 and 2	30	6	2500 words
2	Coursework - e-Portfolio	1 and 2	70	12	na

Learner Development

This Unit particularly focuses on the development of your abilities in the following areas:

Enquiry	You will learn how to evaluate several mobile apps solutions for a given problem in a scientific way.
Contextual Understanding, including where employer based	In addition to learning how to develop a cross-platform mobile app, you will be able to discover the commercial relevance of mobile app development.
Collaboration	The unit include in-class group activities to enhance you communication skills.

Enterprise	For both assignments. You will have the chance to work on a real project proposed by an external company.
Assessment 1 Details	You will submit an individual written report of 2500 words covering key concepts and technologies in mobile application development.
Assessment 2 Details	You will produce an electronic portfolio related to the area of mobile application development. You will receive formative feedback during the development of your e-portfolio and will receive a single grade upon the final (summative) e-portfolio that you submit.
Assessment 3 Details	
Assessment 4 Details	

Threshold Expectations

In order to pass Assessment 1 you will need to :

Identify a user experience problem

Propose a solution to the problem

Identify and explain the target user group for the problem and solution.

Identify and review the relevant design.

Develop personas, scenarios and use cases based on the target user study.

Present an initial design for the solution to the given problem

Provide an evaluation plan for the solution

In order to pass Assessment 2 you will need to:

Apply justified methods and technologies based on users' requirements and types of functionalities to create a working solution following clearly expressed design approaches.

Evaluate the design and development of a mobile application using methods and techniques you learnt during teaching.

Present and discuss your own contribution to the overall solution.

In order to pass Assessment 3 you will need to:

In order to pass Assessment 4 you will need to:

Section B

Recommended Reading

Core Text - this unit is supported by the following core text:

See <https://bedfordshire.rl.talis.com/units/cis099-2.html>

Guided Reading

The following is expected reading for this unit. Details of what to read and when will be provide in the BREO site.

See <https://bedfordshire.rl.talis.com/units/cis099-2.html>

Independent Study

To receive high grades you will need to demonstrate your wider reading. The following resources provide useful background reading for the material in this unit. This is not an exhaustive list and students should read widely from the variety of journals available in the Learning Resources Centre.

See <https://bedfordshire.rl.talis.com/units/cis099-2.html>

Equality Impact Assessment

Question	Y/N/NA	Additional anticipatory adjustments/actions if necessary
Learning materials will be made available in advance of sessions for students to adapt as appropriate?	Y	On BREO
The approach to teaching and learning is sufficiently flexible to enable all students to succeed?	Y	The unit will teach the basics that all student will be accessed, and further the advance skills and knowledge will also be covered during practical sessions.
The approach to group work takes account of the needs of students with disabilities and from diverse backgrounds?	Y	Students are given opportunity to form their own groups, which will enable them to work with people they would like to work with and be kind to each other. Further, the students will contribute different part of the project as a team, and the students' work will be assessed individually for their contribution.
The approach to practical work takes account of the needs of students with disabilities?	Y	We have extra demonstrator in place to support individual needs.
Students with a protected characteristic* have an equal opportunity to achieve the learning outcomes?	Y	There is no need for student to release their protected characteristics if they do not want to.
The assessment tasks provide all students with an equal opportunity to succeed?	Y	All the core skills and knowledge in the learning outcomes will be accessed.

Any other aspects of the unit that might pose potential challenges from an equality or diversity perspective have been considered?	NA	
--	----	--

* Age, Gender reassignment, Marriage and civil partnership, Pregnancy and maternity, Race, Religion and belief, Sex, Sexual orientation

Section C

Administrative Information – Faculty completion	
Faculty	Creative Arts Technologies and Science
Portfolio	CU-COM
School/Department	School of Computer Science and Technology
HECOS Code(s)	100374
Unit Co-ordinator	Haiming Liu
Apprenticeship ?	No

Courses that this unit is delivered on
BSc (Hons) Software Engineering
BSc (Hons) Computer Science and Software Engineering
BSc (Hons) Business Information Systems
